Hi Michael,

We have gotten direction that we are taking a presentation to Council on July 6, but removing any information in the presentation or feasibility study showing location. It will be presented that the feasibility study work can be applicable to any site. We will need you and Mike Roma to be in person for that presentation on July 6th. Let's talk further this afternoon regarding dates and status of the presentation and related documents.

As we work through submitting the admin report for this council meeting, we are needing to include some information on the list of non-aquatic cuts (size and square footage). Can you prioritize this and get us something by end of the day?

Let's chat further about this at our check in this afternoon.

Thanks,

Neil Struthers, P.Eng.
