Subject: [External email] Very Concerned

I am outraged with your motion banning advertising by oil & gas companies at / on city property. It is both shocking and embarrassing to every citizen who voted for you to know you are making decisions without giving matters thorough consideration. Particularly such matters that are certain to have such a significant impact on our economy! This beautiful city benefits greatly from these companies through jobs and tax revenues.

Carbon footprint is important but these companies' fossil fuel goals are on track. Why risk their departure? Why make us the laughing stock of the west?
