Re: Canadian energy is responsible energy

Dear Councillor Leblanc,

The decision by the Executive Committee to pass a motion prohibiting Canadian oil and natural gas companies from supporting City of Regina events makes zero sense. Does this include the Co-op refinery? One of our city's largest employers. Or what about Evraz? They manufacture much of the pipe to support the transportation of fossil fuels. Will they be excluded as well?

Has City Council thought the implications of this through? Over 30,000 people in Saskatchewan are employed by the oil and natural gas industry.

This motion will do nothing in the fight against global emissions. All it does is condemn the livelihoods of thousands of Canadians.

Thank you Mayor Masters, Councillors Findura, Bresciana and Shaw for voting against this motion. I hope you can convince your colleagues to do the same.

Sincerely,

28(1)
