Subject: [External email] Incredible

Firstly please send this to the rest of the councillors I could not find email addresses for.

I find it incredible that the councillors for the city of Regina (Except for the Mayor and 3 others) voted for the completely ludicrous motion.

There is many thousands of people in this city and many hundreds of companies that work directly for the energy sector.

You have just literally spit in their face and said we do not care about you and you are insignificant.

I ask you how are face masks made, face shields, rubber gloves etc. With oil products.

The health care system is one of the largest users of energy products (everything is made from plastic which comes from oil). So if you do not want this advertising then remove your masks and don't go any health care provider.

Effective this morning I contacted my architects and engineers and have put on hold all work for the expansion in Regina of my business and if this motion passes I will guarantee that I will move to a more business friendly city.

Get back to the work of managing the city. Work on improving the city not destroying it. Work on finding efficiencies in city operations and not having 10 people at a site and only 2 working and on and on.
