Hi Sandra

I just wanted to contact you in regard to the motion involving the energy sector, and I couldn't believe the stupidity shown by some of these councilors in bringing this up. It just shows how out of touch these people are and also the constituents they represent, if in fact they even knew that this would be brought up by their representatives.

I just wanted to say how well John Findura does at his role in city governance. I have had the opportunity to call him on a couple of occasions and have to say that he gives it his all, and has a skill set combined with wisdom that makes us proud to call him our representative in this city. These are qualities in short supply in many of his cohorts I have to say.

Thank you

Sincerely

Please know that as a resident of regina that last thing I want is a city council who will dictate to us to rid our city of anything fossil fuel related. The taxes on us are already a huge burden to the point that we will move elsewhere at the first opportunity. With the federal governments noose around our necks this present council is just tightening it further. It is foolish to throw out the baby with the bathwater. Encourage sustainable projects but do not force the ones that are keeping us alive out. That is just stupid. Turn off the power to those homes who want no fossil fuels. We won't miss them. I would be happy to discuss my opinion further if desired. I'm ready to picket city hall if necessary.

I support the ban 100%. It is time to move forward to the future not stay mired in the past.

Remember we had a lockout that attacked workers in our city by a local company. I am still very angry with them about this, and it was aided by the work camp that was permitted by the city.

The workers need support and that will mean training in NEW jobs in NEW industries, not the old ones that will drag us down. The change is going to happen.

a taxpayer and voter in the city of Regina.

Hello and congratulations on the new position, I hear the council wants to band energy advertising! I sure hope they have thought and research this long and hard, I also hope they walk to work and heat there house with good intentions, I am extremely embarrassed they did this without consulting the community, good on you for voting it down, nothing less than removal from Council for these members who voted in favor of this, good luck working with these people!
