Dear \_\_\_\_\_,

Re: Access to Information Request #2014G-54 – Water Main Break Data Set

---

Thank you for your access to information request received on November 19, 2014, requesting access to:

“an electronic list showing the date and location of all water main breaks in the City of Regina from 1990 to the present, or most recent date available. Where available, I would like geocoding information (latitude and longitude) included for each water main break. Please provide in spreadsheet or a database format, such as Microsoft Excel, Access or .CSV.”

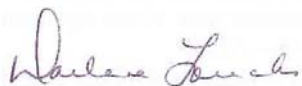

The most recent information the City has in the format you've requested is from 2009 to present which has been enclosed for your information. The document is titled Main Break stats 2009 to November 10, 2014. This spreadsheet was not linked to any geocoding.

The City does have information from 1990 to 2008 but not in the format you've requested. The information will have to be manually gathered so it will take considerable time to pull that information together. If you wish to obtain this additional information a fee estimate will have to be prepared. Please advise if you wish to:

1. have access to information from 1990 to 2008 in the format requested
2. have addresses geocoded

If I can assist you in narrowing or further defining the scope of your request or if you would like to include additional information in the request, please do not hesitate to contact me directly at (306) 777-7070 or by email at [dloucks@regina.ca](mailto:dloucks@regina.ca).

Yours truly,

Darlene Loucks  
Access to Information and Privacy Coordinator
