REAL Planning Session

16(1)(b)

- Is there more of an economic draw to have the pool at the yards vs. the sportplex site?
- Do we frame it as the primary location at the Sportplex and secondary at the Yards
- Arena committee set percentages for Place making, financial opportunities, events, construction and operational functionality then they voted to determine the location
- Need to consider how much we took into consideration the exposure that the sportplex site gives us in the operating and the economic development chapters of the feasibility study
- Now that we potentially know the arena is not going at the yards that opens up an opportunity for the pool
- How long would it take to analyze the yards site for the pool
- What other destinations are on the green loop

Non-Responsive

- Going to have to change the feasibility study to add the yards as another option

16(1)(a)(b)

- Add amenities to the loop
  - o Location of the arena driving alternate location for aquatics – Deb needs to help ELT understand this and help the Mayor understand this
  - o Need to explain why we didn't explore it to begin with

16(1)(a)(b)

- o Are we adding the other site into the feasibility study and how long will that take
- o Brian will share information with the City – Give Brian the size for our three options so that he can add these to the presentation
- o Recreational plans – TBD will draw concepts and get it to the team
- o Discussion around structure and group to move this forward (ie staff working committee)

-
