

## SCHEDULE "A"

### Part A – Request Form

Please see attached.

### Part B – Description of Records

Any records or information providing background on the purpose or intention for constructing the underpass which appears to have previously been that portion of Rg Rd 2203 which crossed in an east to west direction under provincial trunk Highway 11, approximately 2 miles north of the City of Regina. An overhead picture of the approximate location of the previous underpass is included below. We are particularly interested in records from around the time the underpass was constructed which show the reasons for why the underpass was necessary and why it was constructed.
